

*[This document will provide monthly updates to the RA on anything that you have brought to his attention previously, in addition to any new issues. Bullet format for each item, keep to one-page.]*

Ongoing Cases:

- 

**Nonresponsive based on revised scope**

- **Blades, Delaware** - March 26, 2018, OSRTI concurred with EPA's sampling plan to lead a SI assessment surrounding two facilities and in residential areas impacted by PFAS. Site Assessment to proceed with the SI and assessment of the groundwater and surface waters surrounding the public and residential wells that have been impacted with PFAS. EPA Site Assessment is in the process of finalizing the sampling plan and expects to begin the onsite investigation mid-June. EPA Removal Program continues to arrange and conduct sampling at private residences in the affected area.
